SUMMARY

Full Stack Web Developer with 3+ years of experience building responsive websites, admin dashboards, CRUD-based applications, and database-driven platforms using PHP, Laravel, CodeIgniter, React.js, JavaScript, Bootstrap, MySQL, and PostgreSQL. Skilled in REST API integration, MVC architecture, authentication, role-based access control, dynamic UI development, SEO/PWA improvements, debugging, and production website maintenance. Experienced in developing scalable, user-friendly applications for business websites, e-commerce/catalog platforms, NGO websites, travel platforms, and multi-organization sports management systems.

EXPERIENCE

Full Stack Web Developer — Vapi, Gujarat

Allied Infosoft — *November 2022 - Present*

- Developed and maintained responsive, mobile-first web applications using HTML5, CSS3, Bootstrap, JavaScript, jQuery, React.js, PHP, Laravel, and CodeIgniter.
- Built dynamic admin dashboards with CRUD operations, authentication, role-based access control, database management, and reusable backend modules.
- Created and integrated REST APIs, contact forms, email workflows, and third-party services including PHPMailer for production websites.
- Designed and managed MySQL databases, optimized queries, and maintained data integrity for dynamic websites and business applications.
- Improved UI quality with custom CSS, SASS, Bootstrap components, responsive layouts, cross-browser compatibility, and accessible design practices.
- Maintained live websites by fixing bugs, improving SEO, adding PWA features, updating content, and enhancing performance and usability.
- Collaborated with designers, QA engineers, project managers, and clients to deliver business-focused web solutions within project timelines.
- Used Git and GitHub for version control, code collaboration, review, and safe release management.

Trainee Developer — Vapi, Gujarat

Allied Infosoft — *August 2022 - October 2022*

- Assisted in developing frontend website architecture, responsive web pages, backend functionality, databases, and server-side modules.
- Created HTML templates, CSS stylesheets, JavaScript components, and PHP/CodeIgniter modules for client websites.
- Tested websites for functionality, usability, responsiveness, and browser compatibility while supporting bug fixing and content updates.

Web Developer Intern — Vapi, Gujarat

Allied Infosoft — *January 2022 - July 2022*

- Learned and applied HTML, CSS, JavaScript, Bootstrap, PHP, CodeIgniter, and React fundamentals through live task-based projects.
- Built frontend layouts, integrated dynamic data, supported admin panel development, and maintained reusable code.

WordPress Web Developer Intern — Vapi, Gujarat

NESAIT — *July 2021 - August 2021*

- Designed WordPress frontend pages, supported backend configuration, tested website performance, and resolved content-related issues.

PROJECTS

Sports Hub - Multi-Organization Sports Management Platform

React.js, Node.js, Express.js, PostgreSQL

- Developed frontend screens and dynamic user responses for a sports management platform used by multiple organizations to manage sports operations from one system.
- Built React.js UI modules for organization management, sports activities, user workflows, event/session views, and dynamic data rendering from backend APIs.
- Worked with Node.js, Express.js, and PostgreSQL-based backend flows to support structured data, scalable responses, and multi-organization usage.

Ganesh Chemical Pesticides E-Commerce/Catalog Website

CodeIgniter, PHP, MySQL, Bootstrap, jQuery, AJAX

- Developed a product-driven catalog platform with 250+ products, product variations, AJAX-based product display, and quotation request functionality.
- Built backend modules for product management and improved bulk enquiry handling through structured product selection and contact workflows.

I Dream Foundation NGO Website

Laravel, PHP, MySQL, Bootstrap, HTML, CSS

- Delivered a responsive full-stack NGO website with structured frontend pages and dynamic backend functionality.
- Created mobile-friendly layouts and admin-managed content sections to improve website maintenance and user experience.

Luxury Travel Website

Laravel, MySQL, Bootstrap, JavaScript

- Developed a dynamic travel website to manage packages, locations, and frontend presentation through Laravel-based backend modules.
- Improved user experience with responsive package sections, clean UI components, and admin-managed dynamic content.

Allied Infosoft Website

HTML5, CSS3, Bootstrap, JavaScript, SEO, PWA

- Developed responsive frontend pages aligned with company branding and improved cross-device user experience.
- Supported website maintenance, bug fixing, SEO improvements, and PWA-related enhancements.
